Seeking Position in: Software development

I am a software developer, with a wide range of skills, such as communication, leadership, and can work with teams as shown from previous experiences

Technical Skills and
Languages:

Proficient: NodeJS, HTML, Python, TypeScript, SQL,
Java
Familiar: C#

Tools:

Visual Studio, MySQL Database Management, MarinaDB, Github,
Bitbucket, git, SSH, PuTTY, bash,

Professional Experience:

Chat Bot Developer

Droplet Development | April 2019- December 2019

Worked with a small team to code Chatbot software. During my time there, I created a chatbot with the intention to aid with security on software, and helped create a bot under the name “Reaction Roles”. The skills used consisted of mysql, MarianaDB, mangoDB, NodeJS, EJS, Vue, and React for different projects. We were able to work together using git and gitlab, until I resigned in 2019 due to personal reasons that made me loose the time to be able to work on the time.
