Seeking Position in: Software development

I am a software developer with a wide range of skills, previously working with teams, and depending on the need, can work as a side developer, or solo programmer. I can work in a range of enviroments, online or personal.

Technical Skills:

Languages: Java, Javascript, HTML,c#, python,CSS,NodeJS,

Tools: Visual studio(2013,2015,2019), MySQL Database Management, Github, Bitbucket, git, SSH, PuTTY, bash, powershell, Windows Terminal

Professional Experience:

Online Chat Bot Developer
Droplet Development | April 2019- December 2019
Worked with a group of people to run chat bots, making a bot solo and another one with a group of 3 people. Used mysql, MarianaDB, and mangoDB for dif erent projects, and used gitlab as a team, and for all other projects.
